

Task Text Legend (sorted by weight w)

A. Process or interpret signals or sensor data.

(IM=4.04, FR=4.32, w=0.069)

B. Supervise technologists, technicians, or other engineers.

(IM=3.76, FR=4.31, w=0.064)

C. Provide technical support for robotic systems.

(IM=3.81, FR=4.08, w=0.061)

D. Debug robotics programs. (IM=3.92, FR=3.92, w=0.061)

E. Review or approve designs, calculations, or cost estimates. (IM=4.11, FR=3.68, w=0.060)

F. Create back-ups of robot programs or parameters.

(IM=3.85, FR=3.65, w=0.056)

G. Build, configure, or test robots or robotic applications. (IM=3.89, FR=3.61, w=0.055)

H. Install, calibrate, operate, or maintain robots.

(IM=3.68, FR=3.60, w=0.052)

I. Evaluate robotic systems or prototypes. (IM=3.68, FR=3.40, w=0.049)

J. Design software to control robotic systems for applications, such as military defense or manufacturing. (IM=3.75, FR=3.33, w=0.049)

K. Conduct research on robotic technology to create new robotic systems or system capabilities. (IM=3.74, FR=3.23, w=0.048)

L. Document robotic application development, maintenance, or changes. (IM=3.60, FR=3.20, w=0.046)

M. Integrate robotics with peripherals, such as welders, controllers, or other equipment. (IM=3.69, FR=3.12, w=0.045)

N. Write algorithms or programming code for ad hoc robotic applications. (IM=3.41, FR=3.23, w=0.043)

O. Design robotic systems, such as automatic vehicle control, autonomous vehicles, advanced displays, advanced sensing, robotic platforms, computer vision, or other robotic systems. (IM=3.78, FR=2.83, w=0.042)

P. Train robotic systems and teach tool plans to robots. (IM=3.32, FR=3.20, w=0.042)

Q. Investigate mechanical failures or unexpected maintenance problems. (IM=3.71, FR=2.83, w=0.041)

R. Conduct research into the feasibility, design, operation, or performance of robotic mechanisms, components, or systems, such as planetary rovers, multiple mobile robots, reconfigurable robots, or man-machine interaction. (IM=3.61, FR=2.80, w=0.040)

S. Design and create forms, diagrams, or charts.

T. Make system device lists or event timing charts.
